-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 05 July 2007 and 09 July 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: _____.

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114.

Applicant's submissions filed on 7/5/2007 and 7/9/2007 have been entered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 20, 22-25 and 27 are rejected under 35 U.S.C. 102(b) as being anticipated by WO'756. WO'756 teaches, in the claims for example, a process of producing nano-particles which may be silver (see claim 13 for example) from silver metal precursor materials including heating the precursor material in a furnace (the plasma reactor) to vaporize the precursor material, mixing the precursor material with a carrier gas which may be nitrogen (see page 16 lines 3-4 for example) in a mixing region, drawing the vaporized precursor material and carrier gas into a conduit (the cooling tube of WO'759), cooling the precursor material to precipitate

silver nano-particle material, and separating and collecting the silver nano-particle material, thereby showing all aspects of the above claims.

Claims 19-25 and 27 are rejected under 35 U.S.C. 102(a) as being anticipated by Pozarnsky et al'986. Pozarnsky et al'986 teaches a process of producing nano-particles which may be silver (see paragraph [0066] for example) from silver metal precursor materials including heating the precursor material inductively (see paragraph [0083] where inductive heating is mentioned as a suitable heating means) in a furnace to vaporize the precursor material, mixing the precursor material with a carrier gas which may be nitrogen (see paragraph [0078] for example) in a mixing region, drawing the vaporized precursor material and carrier gas into a conduit, cooling the precursor material to precipitate silver nano-particle material, and separating and collecting the silver nano-particle material, as described in paragraphs [0082]-[0089] for example, where pressures and temperatures are within the instantly recited ranges, thereby showing all aspects of the above claims.

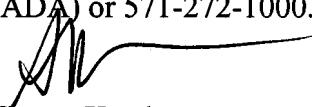

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Scott Kastler whose telephone number is (571) 272-1243. The examiner can normally be reached on Monday through Friday.
